RE: Amendments to Patent Application #10/792,148, filed 3/4/04.

Dear Sir:

I wish to amend my application. On page 2 line 17 there is made reference to a reservoir that is spun. As is stands only in the twelfth Preferred Embodiment starting on page 14 line 23 is this reference described. Yet this is a Basic Structure of the invention.

Therefor in the section Basic Structures of the Invention I have added a description of this structure as well as Fig. 1a and claim 18 is rewritten. The description and Drawing are a stripped-down version of the twelfth Preferred embodiment. There is no new matter. The numbering of parts in new Fig. 1a follows that of Fig. 14 with a new #86 because the corresponding name in Fig. 14 is called by a more general name.

Listing of Claims:

1-17 (original)

*(currently amended)*  
18. ~~The apparatus of claim 1 wherein said working=fluid=operatedly=--  
connected-to-a-live-load-is-spun-so-said-working-fluid-is-made  
to-flow\* reservoir is made to spin around a shaft means see cl. 18~~

New insertions are after page 3, line 6 and page 5 line 16.

Most Respectfully,

*Edwin Newman*
